

摩托车防抱死制动系统 (MABS)

Motorcycle Antilock Braking System

产品介绍 Product Description

凯晟摩托车防抱死制动系统 (MABS) 是根据摩托车动力学特性及制动系统特点设计的, 旨在提高摩托车在紧急制动时的安全性与稳定性。

KESENS MABS (Motorcycle Anti-lock Braking System) is engineered based on motorcycle riding dynamics and specific braking characteristics to enhance safety and stability during emergency braking scenarios.

产品优势 Product Advantages

- 系列化: 具有单通道和双通道产品, 面向不同类型的摩托车
Modular Design: Features single-channel and dual-channel configurations tailored for different motorcycle types.
- 高性能: 对标国际先进产品, 性能全面优异
High Performance: Benchmarked against leading international products with comprehensively superior performance.
- 自主化: 正向自主研发, 易于实现功能配置升级
Full In-House R&D: Proprietary forward development enables seamless functional upgrades and customization.

产品功能 Product Functions

- 防抱死功能
ABS (Antilock Braking System)
- 后轮离地保护功能
RLP (Rear Wheel Lift-up Protection)
- 牵引力控制功能
TCS (Traction Control System)
